

JAYPEE UNIVERSITY OF INFORMATION TECHNOLOGY, WAKNAGHAT

TEST -3 EXAMINATIONS- 2026

B.Tech-IV Semester (CSE/IT/BI)

COURSE CODE (CREDITS): 25B1WCI431 (2)

MAX MARKS: 35

COURSE NAME: Data Analytics using R and Python

COURSE INSTRUCTORS: ATA, AYS, RVS

MAX. TIME: 2 Hours

Note: (a) All questions are compulsory. (b) The candidate is allowed to make Suitable numeric assumptions wherever required for solving problem (c) Use of calculator is allowed

Q. No	Questions	CO	Marks																																								
Q1	The following Python code is intended to build a frequency dictionary from a nested list of student scores, but it produces wrong output. Identify all bugs, explain why each one is logically wrong, and write the corrected version: <pre>scores = [[85, 90, 85], [90, 70], [85, 70, 70]] freq = {} for group in scores: for s in group: if s not in freq: freq[s] == 0 freq[s] =+ 1 print(freq)</pre>	2	5																																								
Q2	A nutrition researcher studies the effect of three different diets — Low-Carb, Mediterranean, and High-Protein — on weight loss (in kg) over 8 weeks. Six participants were assigned to each diet group. After the study, each participant was also given a diet adherence score (out of 10) by a dietician, and their overall health improvement rank (1 = best) was recorded. The data for weight loss across the three groups Table 1 and the adherence/rank data for the Mediterranean group Table 2 are given below. <table><tr><th colspan="3">Table 1</th><th colspan="2">Table 2</th></tr><tr><th>Low-Carb</th><th>Medit</th><th>High-Prot</th><th>Adherence (X)</th><th>Health Rank (Y)</th></tr><tr><td>4.2</td><td>3.8</td><td>5.1</td><td>6</td><td>5</td></tr><tr><td>5</td><td>4.5</td><td>5.8</td><td>8</td><td>3</td></tr><tr><td>3.8</td><td>3.2</td><td>4.6</td><td>4</td><td>6</td></tr><tr><td>6.1</td><td>5</td><td>6.3</td><td>9</td><td>1</td></tr><tr><td>4.7</td><td>4.1</td><td>5.5</td><td>5</td><td>4</td></tr><tr><td>5.3</td><td>3.6</td><td>6</td><td>7</td><td>2</td></tr></table>	Table 1			Table 2		Low-Carb	Medit	High-Prot	Adherence (X)	Health Rank (Y)	4.2	3.8	5.1	6	5	5	4.5	5.8	8	3	3.8	3.2	4.6	4	6	6.1	5	6.3	9	1	4.7	4.1	5.5	5	4	5.3	3.6	6	7	2	3	5
Table 1			Table 2																																								
Low-Carb	Medit	High-Prot	Adherence (X)	Health Rank (Y)																																							
4.2	3.8	5.1	6	5																																							
5	4.5	5.8	8	3																																							
3.8	3.2	4.6	4	6																																							
6.1	5	6.3	9	1																																							
4.7	4.1	5.5	5	4																																							
5.3	3.6	6	7	2																																							

	a)Using Table 1, perform a one-way ANOVA at $\alpha = 0.05$. Use $F_{critical}(2, 15) = 3.682$ and state your conclusion. b)Using Table 2, compute Spearman's Correlation, Test significance at $\alpha = 0.05$ using $df = 4$, $t_{critical} = 2.776$. Interpret the result.														
Q3	An IT hardware supplier tracks the following server component bundles in a series of custom build orders: <table><thead><tr><th>TID</th><th>Components Purchased</th></tr></thead><tbody><tr><td>T100</td><td>GPU, RAM, SSD</td></tr><tr><td>T200</td><td>GPU, Motherboard, CPU, Cooler</td></tr><tr><td>T300</td><td>RAM, Motherboard, CPU, PSU</td></tr><tr><td>T400</td><td>GPU, RAM, Motherboard, CPU</td></tr><tr><td>T500</td><td>GPU, RAM, Motherboard, PSU</td></tr></tbody></table> Using the Apriori Algorithm, identify all frequent itemsets with a minimum support threshold of 60%. Show the candidate and frequent sets for each pass.	TID	Components Purchased	T100	GPU, RAM, SSD	T200	GPU, Motherboard, CPU, Cooler	T300	RAM, Motherboard, CPU, PSU	T400	GPU, RAM, Motherboard, CPU	T500	GPU, RAM, Motherboard, PSU	4	4
TID	Components Purchased														
T100	GPU, RAM, SSD														
T200	GPU, Motherboard, CPU, Cooler														
T300	RAM, Motherboard, CPU, PSU														
T400	GPU, RAM, Motherboard, CPU														
T500	GPU, RAM, Motherboard, PSU														
Q4	Consider the following dataset of software installations: <table><thead><tr><th>User</th><th>Installed Tools</th></tr></thead><tbody><tr><td>U1</td><td>VS Code, Git, Docker</td></tr><tr><td>U2</td><td>VS Code, Git</td></tr><tr><td>U3</td><td>VS Code, Docker</td></tr><tr><td>U4</td><td>Git, Docker</td></tr><tr><td>U5</td><td>VS Code, Git</td></tr></tbody></table> Calculate the Support of {VS Code, Git} and the confidence of the rule {VS Code $\rightarrow$ Git}, and explain using the Apriori property why all subsets of a frequent itemset must also be frequent.	User	Installed Tools	U1	VS Code, Git, Docker	U2	VS Code, Git	U3	VS Code, Docker	U4	Git, Docker	U5	VS Code, Git	4	4
User	Installed Tools														
U1	VS Code, Git, Docker														
U2	VS Code, Git														
U3	VS Code, Docker														
U4	Git, Docker														
U5	VS Code, Git														
Q5	Using the following transaction database, construct the FP-Tree and find all frequent 2-itemsets using the FP-Growth approach. Assume minimum support count = 3. <table><thead><tr><th>TID</th><th>Items Purchased</th></tr></thead><tbody><tr><td>T1</td><td>{A, B, D}</td></tr><tr><td>T2</td><td>{B, C, E}</td></tr><tr><td>T3</td><td>{A, B, C, E}</td></tr><tr><td>T4</td><td>{B, E}</td></tr></tbody></table>	TID	Items Purchased	T1	{A, B, D}	T2	{B, C, E}	T3	{A, B, C, E}	T4	{B, E}	4	4		
TID	Items Purchased														
T1	{A, B, D}														
T2	{B, C, E}														
T3	{A, B, C, E}														
T4	{B, E}														

	T5	{A, B, C, E}			
Q6	Write down 2 packages and 4 functions of R language for machine learning with functionality.			2	3
Q7	As a data scientist, what skills are required to complete any project of data analytics.			1	2
Q8	How can Kendall Tau be applied in machine learning model evaluation for ranking problems?			3	2
Q9	A dataset contains the following records for loan approval:			5	6
	Income	Credit Score	Loan Approved		
	High	Good	Yes		
	High	poor	Yes		
	Medium	Good	Yes		
	Low	Good	No		
	Low	Poor	No		
	a)Determine the best attribute split using Gini Index b)Construct the first level of CART tree				

ALL THE BEST
