Dr R. Bhadt

## JAYPEE UNIVERSITY OF INFORMATION TECHNOLOGY, WAKNAGHAT SUMMER SEMESTER EXAMINATION- 2018

## B.Tech (VIII) Semester

COURSE CODE: 17B1WCI814

MAX. MARKS: 50

COURSE NAME: Design and Analysis of Real World Algorithms

**COURSE CREDITS: 3** 

MAX. TIME: 2 Hr

Note: All questions are compulsory.

## 1. [10 Marks]

Explain the ID3 and candidate elimination algorithm with following:

| Origin     | Manufacturer                            | Color | Decode | Туре    | Example  |
|------------|---|-------|--------|---------|----------|
| <b>4</b> 6 | , |       |        |         | Type     |
| Japan      | Honda                                   | Blue  | 1980   | Economy | Positive |
| Japan      | Toyota                                  | Green | 1970   | Sports  | Negative |
| Japan      | Toyota                                  | Blue  | 1990   | Economy | Positive |
| USA        | Chryler                                 | Red   | 1980   | Economy | Negative |
| Japan      | Honda                                   | white | 1980   | Economy | Positive |

2. [10 Marks]

- a. Explain how the distribution of secret keys is facilitated by public key cryptography.
- b. Write notes on the following.
  - i. MAC
  - ii. Hash function

3. [10 Marks]

- a. What is the need for digital signatures? Explain important properties of digital signatures.
- b. What is the role of a function approximation algorithm? How does learner system estimate training values and adjusts weights while learning?

4. [10 Marks]

- a. Write the algorithm steps for Schnorr signature scheme.
- b. Explain Diffie Hellman key exchange algorithm.

5. [ 10 Marks]

a. Explain elliptic curve cryptography.

b. Explain Authentication protocols for symmetric cipher system.
